PROFESSIONAL SUMMARY

I build digital products with AI and take them to production: a desktop app in beta and a web app with a 3D model. I work with AI-assisted development (Claude Code) and own the product, the experience and the testing. Fluent in English; first-year student of the BSc in Artificial Intelligence and Data Science.

PROJECTS

Cathedra, AI study app for Windows (2026, in development, beta)

- Transcribes recorded lectures and generates explanations, exams and flashcards.
- Combines cloud models with a local engine to work offline.
- Flags any answer that does not come from the course material.

More projects, with screenshots and process, in the portfolio.

SKILLS

Product and AI: AI-assisted development, Claude Code, Claude API, process automation, image and video generation.

Technologies used in my projects, with AI assistance: Python, Node.js, Three.js, PWA, Cloudflare Workers, Netlify, Telegram API.

EDUCATION

BSc in Artificial Intelligence and Data Science, UADE (August 2026 to present, first year)

Business studies, San Ignacio University, Miami, United States (2026)

LANGUAGES

Spanish: native · English: fluent (Duolingo English Test, B2)
